PROJECT REVIEW : MILESTONE PROJECT – 2

Date: 17-04-2026

Job Portal Management System

SDG: SDG 8: Decent Work and Economic Growth

Presented By:

Arava Saisnikitha – VTU28387 – 23UECS2023.

Courses Handling Faculty:

Dr.HAFIZUR RAHMAN.

INTRODUCTION

1

- A **Job Portal Management System** is a web-based application designed to connect job seekers and employers on a single platform, making the recruitment process faster, easier, and more efficient.
- The system allows **job seekers** (such as students or professionals) to create profiles, upload resumes, search for jobs based on skills, location, or category, and apply for suitable job openings. It also enables them to track the status of their job applications in real time.
- On the other hand, **employers** can register on the platform, post job vacancies, view applications, shortlist candidates, and manage the hiring process digitally without manual paperwork.
- The main objective of this project is to reduce the gap between job seekers and recruiters by providing a centralized platform that simplifies job searching and recruitment. It improves accessibility, saves time, and enhances efficiency compared to traditional job application methods.
- Overall, the Job Portal Management System acts as an online bridge between talent and opportunity, making the hiring process more organized and transparent.

PROBLEM STATEMENT

1

2

- Job seekers face difficulty in finding relevant jobs, and employers struggle to efficiently manage and filter suitable candidates due to the lack of a centralized system. Hence, a **Job Portal Management System** is needed to connect both in a simple, fast, and organized way.

OBJECTIVE(S)

1

2

3

4

5

6

7

8

9

- To provide a centralized platform for job seekers and employers.
- To allow job seekers to create profiles and upload resumes.
- To enable users to search and apply for jobs easily.
- To help employers post job vacancies and manage applications.
- To improve the efficiency and speed of the recruitment process.
- To reduce manual effort in hiring and job searching.
- To track job applications and selection status online.

PROPOSED SYSTEM

1

2

3

4

5

6

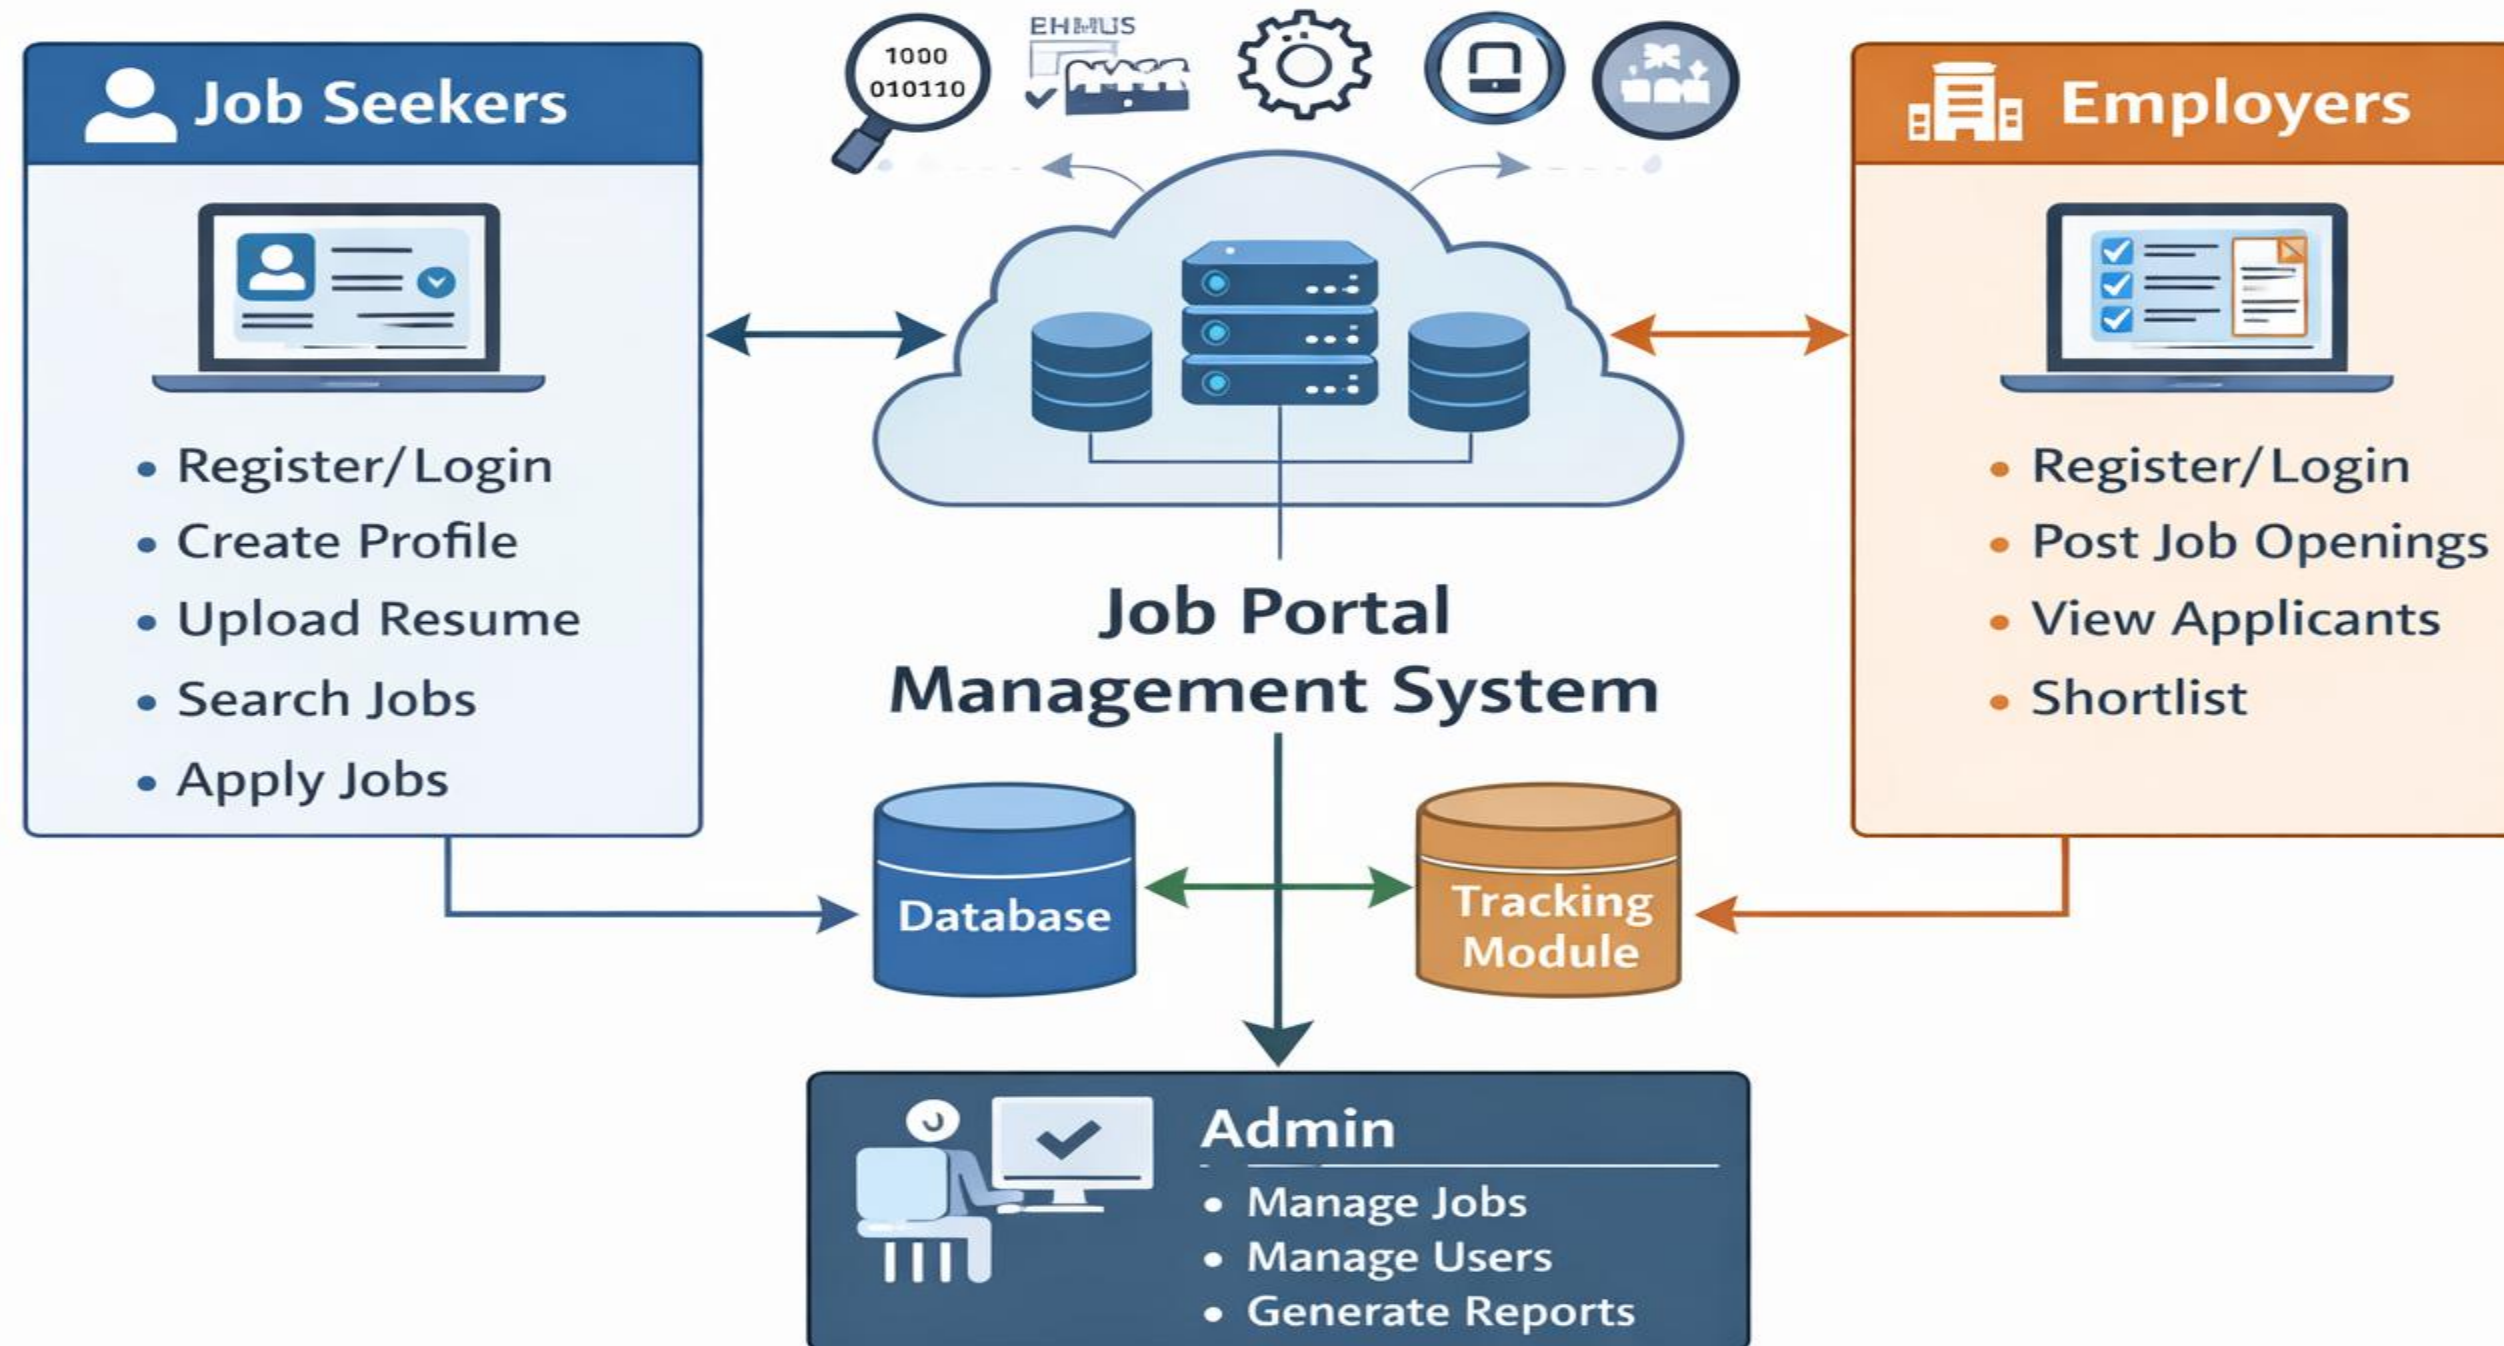

7

8

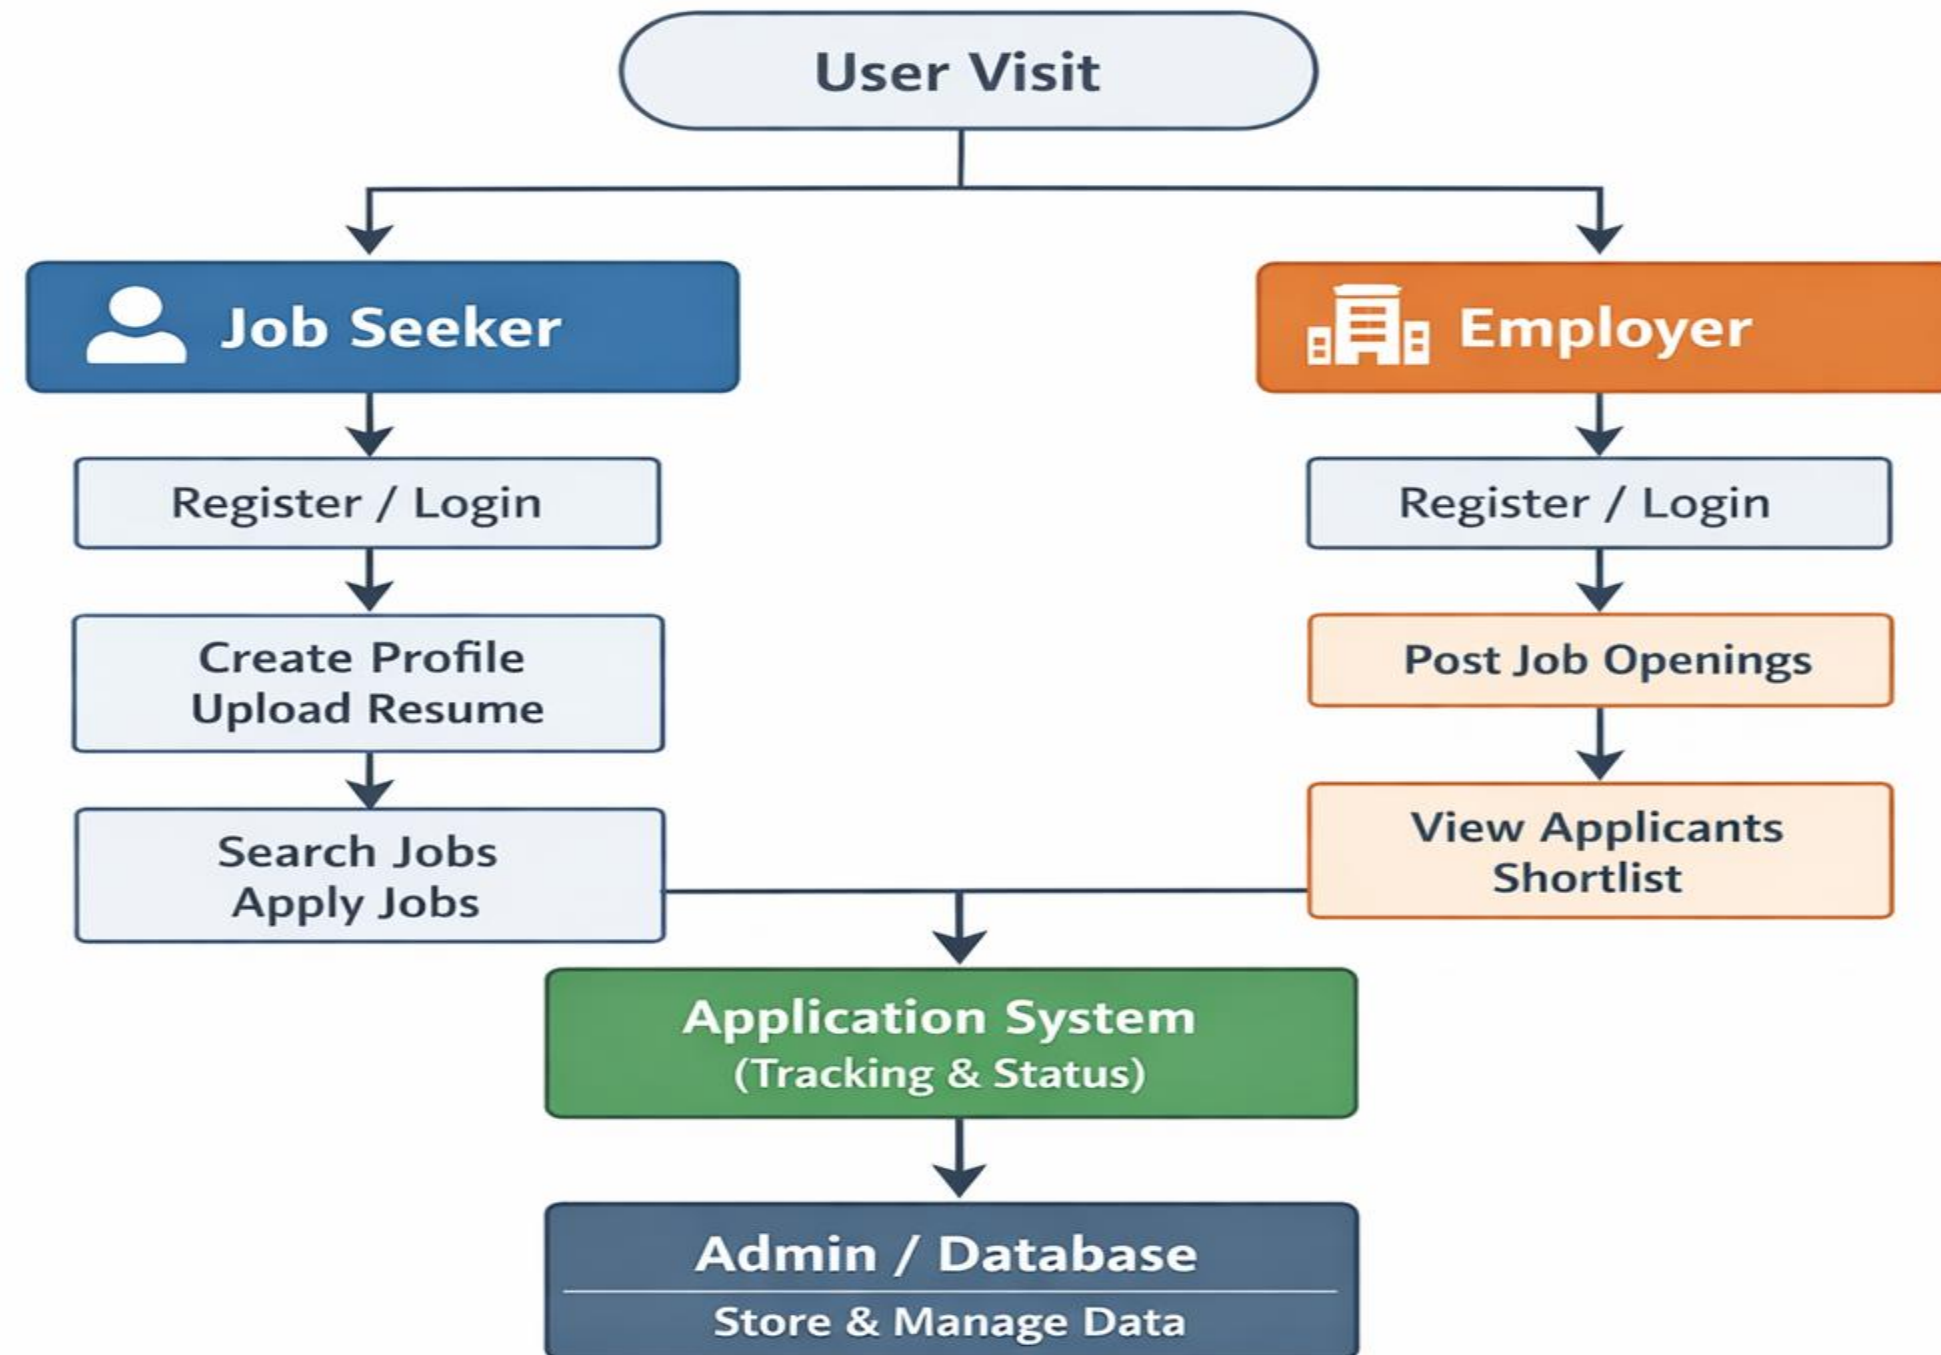

9

- The proposed Job Portal Management System is a web-based application that provides a centralized platform for job seekers and employers to interact efficiently. It allows job seekers to register, create profiles, upload resumes, search for jobs, and apply online. Employers can register, post job vacancies, view applications, and shortlist suitable candidates.
- The system automates the recruitment process by reducing manual work and improving communication between candidates and recruiters. It ensures easy job searching, faster hiring, and better organization of job-related data.
- Overall, the proposed system aims to make the job search and hiring process more simple, fast, and efficient through an online platform.

TECHNOLOGIES USED

1

2

Frontend: HTML, CSS, JavaScript (React/Angular optional)

3

Backend: Java (Spring Boot) / Node.js / Python

4

Database: MySQL / PostgreSQL / MongoDB

5

Authentication: JWT / Spring Security

6

APIs: RESTful APIs (JSON)

7

Tools & Deployment: GitHub, VS Code, Postman, AWS/Cloud hosting

8

MODULE DESCRIPTION

1. User Module (Job Seeker)

Registration and login

Create and update profile

Upload resume

Search and apply for jobs

Track application status

2. Employer Module

Register and login

Post new job vacancies

View and manage applicants

Shortlist or reject candidates

3. Admin Module

Manage users (job seekers & employers)

Approve or delete job posts

Monitor system activities

4. Job Search Module

Search jobs by category, location, and skills

Filter and sort job listings

5. Application Module

Apply for jobs

Store application details

ADVANTAGES & LIMITATIONS

1

2

3

4

5

6

7

8

9

Advantages of Job Portal System

- Easy access to job opportunities anytime, anywhere
- Saves time for both job seekers and employers
- Faster recruitment process
- Wide range of job listings in one platform
- Easy resume upload and application tracking
- Better communication between employers and candidates

Limitations of Job Portal System

- High competition among job seekers
- Fake job postings may occur
- Requires internet access
- Data privacy and security risks
- Over-reliance on online applications (less personal interaction)
- System may become slow with large number of users

Thank you
